

Athif Fadheel Atharahman

Bandung, Indonesia | 0819-3650-3913 | athifadheel@gmail.com

PROFILE

Innovative Electrical Engineering student at Telkom University (7th Sem, 3.51 GPA) specializing in UAVs, visual processing, and telemetry. Proven success at PT PLN (Persero) developing Python-based SCADA automation tools. As Technical Supervisor for KRTI Racing Plane, led the team to a National Top 8 finish via advanced autopilot engineering. Expert in leveraging Deep Learning and Cloud Computing for robust system design. Strong researcher and leader in autonomous vehicle control and manufacturing. Active in research demonstrating strong project management skills in the autonomous systems.

INTERNSHIP HISTORY

Jun 2025 - Aug 2025

SCADA & Automation Division Intern, PT PLN (Persero)
UIP2B JAMALI

Depok

- **Automation Scripting:** Engineered Python scripts to automate downtime analysis and reliability reporting by parsing massive, unstructured server and RTU logs.
- **R&D Prototyping:** Prototyped an open-source ICCP (IEC 60870-6) gateway by compiling complex C-libraries (libiec61850) and debugging low-level system interoperability errors.
- **IT Infrastructure:** Deployed a high-performance Network Attached Storage (NAS) system configured with RAID 0 and static IP addressing for secure local data access.
- **Systems Inspection (FAT):** Executed Factory Acceptance Tests (FAT) for critical 48V DC systems, performing hands-on wiring and inspection of rectifiers and Ni-Cd batteries.

EDUCATION

Sep 2022 - Present

Bachelor, Telkom University

Bandung

- **GPA:** 3.51 / 4.00 (Currently in 7th Semester)
- **Relevant Coursework:** Control Systems, Artificial Intelligence, Telecommunication Networks, Microprocessor Systems.

TECHNICAL SKILLS

- **Programming Languages:** Python (Expert), C/C++ (Embedded/High-Performance), SQL, MATLAB.
- **AI & Computer Vision:** Deep Learning (TensorFlow, Keras), Object Detection (YOLO), Optical Character Recognition (OCR), OpenCV, Pandas, NumPy, Data Analysis & Visualization.
- **Robotics & UAV Systems:** ArduPilot Autopilot, MAVLink Protocol, Mission Planner, Flight Dynamics, Telemetry (RF LoRa & 4G/LTE Hybrid Systems), Visual Odometry.
- **Cloud & Infrastructure:** Cloud Message Queuing (Store-and-Forward Architecture), NAS Configuration (RAID 0/1), Linux/Ubuntu Administration, Virtual Private Server (ZeroTier and TailScale).
- **Web Development (Auxiliary):** HTML/CSS, JavaScript, ReactJS, Node.js, Wordpress.

EXTRA-CURRICULAR ACTIVITIES

Oct 2024 - Present

Deputy Coordinator of External Affairs, APTRG Laboratory

Bandung

- Served as the central point of contact for all external laboratory operations and stakeholder relations, reporting directly to the Laboratory Coordinator.
- Managed official communications with key stakeholders, including faculty advisors, the Directorate of Student Affairs, sponsors, and alumni.
- Oversaw external administrative workflows, including the management of official correspondence and documentation.
- Led the complex process of securing flight permits by liaising directly with local aviation authorities to ensure full regulatory compliance for all team activities.
